

To whom it concerns,

I am writing in regards to NAB petition 04-160. I believe the NAB has no right to try and ban a company from offering services that I am paying for. If the services offered by regular radio were of the quality of what XM gives then there wouldn't be a need for satellite radio. However I am sick of listening to 5-10 minutes of commercials every half hour or waitng 15 to 20 minutes for a traffic report that may not give me the information I need on regular radio. I get these quality services with my XM satellite radio and will gladly pay a monthly subscription fee because it is worth it. Please consider that there are over one million subscribers to XM radio, and it is growing everyday. We choose to to listen to what we want to hear, what NAB is trying to do is not only wrong but it is a form of censorship. They have no right to tell me what I can and can't listen to. I ask that you please reject NAB's petition 04-160.

Sincerely,
Eric Kugel
